6 February 2009

Dear Sir or Madam:

Please accept this letter of recommendation for Timothy Herron, M.D., whom I have known since his neurology residency at Case Western Reserve University.

Dr. Herron has a keen, inquiring mind and approaches medicine not just as a profession, but as both a serious endeavor and an adventure. A patient under his care receives his thorough and thoughtful assessment. He doesn't cut corners. He reads and ponders clinical conditions to expand upon a differential diagnosis in depth. Dr. Herron cares for each of his patients as he would a good friend or family member.

In recent years we have met on several occasions at national conferences, and Dr. Herron has continually impressed me as a scholar of medicine. He will always be a student, as we all should be; with a lifelong commitment to understanding the literature and applying science to compassionate care.

It has always been my pleasure to know and work with Dr. Herron.

Sincerely,

A handwritten signature in black ink, appearing to read 'Tarvez Tucker'.

Tarvez Tucker, M.D.

Associate Professor of Neurology
Medical Director, Department of Neurology
Director, University of Kentucky Headache and Pain Clinic
